

LANTERNS

TRIBÙ STUDIO

DESCRIPTION

The Lanterns bathe any terrace in a cosy, almost magical atmosphere. The warmth of the teak and the simplicity of the design make them the perfect compliment to any outdoor setting. Create variation by alternating the 2 available sizes and by combining them with the teak base.

MATERIALS

- Frame: plantation teak from East-Java. The cover of the lantern is reinforced on the bottom side with stainless steel 304 EP
- Glass: chemically strengthened glass
- Rope: a rope in weather resistant Canax® is attached to the top part of the lantern to easily carry the lantern

USE

Remove the top and place one or more candles in the lantern. Do not use candles higher than 20 cm and always place them underneath the stainless steel part.

MAINTENANCE

Teak

Treat new teak with Teak Protector 4 à 6 weeks after installation. Teak Protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with Teak Super Cleaner. Leave the wood to dry completely and then apply Teak Protector. To avoid labour-intensive cleaning, you can treat the wood with Teak Sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak Sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.
